ABSTRACT

The present application describes monocyclic or bicyclic carbocycles and heterocycles and derivatives thereof of Formula I:

$$\text{M} \quad \text{M}^3 - \text{A}^{\text{B}}$$
$$\text{M}^1 - \text{M}^2$$
$$\text{G} - \text{G}_1$$

I

or pharmaceutically acceptable salt forms thereof, which are useful as inhibitors of factor Xa.
